## SUMMARY

Accomplished Engineering Leader with 11+ years of experience spanning enterprise and startup environments, specializing in full-stack development, technical strategy, and cross-functional team management. Expert in Angular, React, Next.js, Node.js, Python, TypeScript, and AWS cloud architecture. Proven track record of end-to-end product ownership from inception to revenue, reducing page load times by 40%, managing 15+ applications in a monorepo, and leading award-winning digital products with international press coverage. Adept at stakeholder management, Agile/Scrum delivery, and driving scalable, accessible web platforms.

## CORE COMPETENCIES

Engineering Leadership | Technical Strategy & System Design | Product Roadmap Ownership | Cross-functional Team Management | Stakeholder Management | Agile/Scrum Delivery | Full-Stack Development | Cloud Architecture (AWS) | Microservices & API Design | Performance Optimization | Web Accessibility (WCAG) | CI/CD & DevOps

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, Java, HTML5, CSS3, SCSS

**Frontend:** Angular (9+), React, Next.js, SvelteKit, NgRx, RxJS, Tailwind CSS, Angular Material, Storybook

**Backend:** Node.js, FastAPI, Spring Boot, RESTful APIs, GraphQL, Microservices, Serverless Architecture

**Cloud & DevOps:** AWS (EC2, Lambda, S3, CloudFormation), Docker, Kubernetes, Cloudflare, GitHub Actions, Jenkins, CI/CD

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, Amazon Redshift

**Testing:** Jest, Jasmine, Cypress, Karma, TDD

**Tools:** Git, GitHub, New Relic, SonarCloud, Storybook

**Other:** Web Accessibility (WCAG, ARIA), System Design, Distributed Systems, PWAs, Lazy Loading, Code Splitting, Agile/Scrum, OKRs

## PROFESSIONAL EXPERIENCE

### Director, Engineering

Markus AI (Full-Time Consultant)

Jun 2026 - Present

Bengaluru, India

- Spearhead end-to-end product ownership of a B2B Marketing Outreach SaaS platform, defining the technical roadmap and coordinating cross-functional engineering, product, and QA teams from zero to commercial revenue
- Architected and built the full-stack platform from the ground up using Python, FastAPI, Next.js, Node.js, PostgreSQL, and AWS, applying microservices and REST API design principles for scalability and high availability
- Own sprint planning, release management, and CI/CD pipelines end-to-end, ensuring continuous delivery and infrastructure scaling on AWS to support growing product demand
- Serve as primary technical decision-maker and stakeholder liaison, bridging product strategy and engineering execution in a lean, fast-moving startup environment

### Tech Lead

Taylor & Francis Group

Dec 2022 - Jun 2026

Chennai, India

- Directed, mentored, and managed a cross-functional team of 6 engineers to deliver an award-winning eReader application, recognized as Gold Project 2024 with international press coverage across 6+ publications
- Architected, owned, and scaled a monorepo of 15 web applications serving the global publishing platform taylorfrancis.com, applying system design best practices for high availability and performance
- Optimized Angular application performance by 40% through code splitting, lazy loading, and bundle optimization, delivering measurable improvements to user experience at global scale
- Engineered a reusable UI component library using Storybook and Angular Material, standardizing frontend development practices and accelerating delivery across multiple product teams
- Championed WCAG 2.1 and EUAA web accessibility compliance, conducting audits and driving remediation across the platform to ensure an inclusive, regulation-compliant user experience

### Senior Full Stack Engineer

Taylor & Francis Group

Jul 2021 - Dec 2022

- Engineered end-to-end Stripe payment gateway integration supporting Alipay, WeChat Pay, and UnionPay, enabling Chinese market expansion for the global eCommerce platform
- Developed a server-side rendered (SSR) checkout application using Node.js, handling complex payment, invoice, and order management workflows
- Integrated New Relic APM and SonarCloud for full-stack observability, code quality monitoring, and continuous improvement of system reliability

### **Full Stack Engineer**

**Mar 2018 - Jul 2021**

*Taylor & Francis Group*

- Built a zero-touch, end-to-end eCommerce solution for the online eBook business, integrating order management, payment processing, and digital delivery workflows
- Developed an event-driven serverless service on AWS Lambda for automated batch order processing, acknowledgment, and invoicing at scale
- Pioneered micro frontend architecture using Angular 9 for the cart application and adopted SvelteKit early for payment applications, improving team autonomy and deployment velocity

### **Software Development Engineer - Android**

**Mar 2015 - Mar 2018**

*HTC Global Services*

- Developed 12 enterprise mobile applications for Fortune 500 clients as part of the Mobile Centre of Excellence, driving digital transformation initiatives
- Designed and implemented cloud infrastructure for a US-based mobile application that received USPTO patent approval

## **EDUCATION**

---

### **PGP in Artificial Intelligence & Machine Learning**

**Apr 2021 - Apr 2022**

*University of Texas at Austin*

### **Bachelor of Technology in Information Technology**

**May 2015**

*Agni College of Technology*

## **AWARDS & RECOGNITION**

---

Best Tech Lead H1 2025 | Best Tech Lead 2023-2024 | Star Performer Q1 2024 | Best Documentation Award | Delighting Customers Award (Stripe Rollout) | Digital Delivery Award - Informa PLC | Excellence Award from CDO
